

## Passive Server-Side Auto-Save for Quizzes and Exams!

Ucompass.com is proud to announce an exciting enhancement to the Educator system! The Auto-Save for Quizzes and Exams solves one of the most common issues facing users interacting with Educator assessment features.

### **Does the following scenario sound familiar to you?**

You're a student and you are logged into Educator to take a lengthy 100-question examination. You work frantically to complete the exam to the best of your abilities in the time allotted by your instructor. Suddenly, as you approach the 90th question, for some reason, the power blinks shutting your computer off. You turn your computer back on, log back into Educator, and open the exam only to find every question you've answered is now blank. You now have less than 10 minutes to complete 100 questions.

With the new assessment enhancement, this scenario will no longer be an issue!

### **What happens now?**

As the student answers questions on the assessment, their work is being saved in real time on the server. If the assessment allows the student more than one access, the students can start an assessment, complete a portion of it, leave the test, then return and all their work will remain intact. If the assessment is set to only one access, as before, the student may not re-enter the assessment, but the answers given have been saved.

From an instructor's perspective, if a student completes some work on an exam or quiz but does not actually submit it, the instructor can enter that student's exam or quiz form. Instead of seeing the blank assessment, the instructor will now see the work completed by the student prior to the student exiting the assessment. The work completed prior to the student leaving the exam or quiz can be graded by using the Grade button at the bottom of the assessment form.

If you have any questions or difficulties with the new Auto Save, please contact [support@ucompass.com](mailto:support@ucompass.com) or call 877.932.3382.
